Ambitious Career and Coding Initiative
Fall 2018 | Sennett Middle School

7 students developed programming skills and made their ideas a reality by using HTML and CSS to create their own website. While engaging with professionals from TDS Telecom, they learned about innovative leaders and careers in STEM

"I know how to design a website"

"I understand how coding works"

"Just learning how to code, learning the process, was probably the best thing I could learn because that got me interested in STEM." - Caroline

In a front-end web development content acquisition assessment, students showed an average

40
percentage point **Improvement**

Take a look at some of the students' websites:
